## Toy of the Week Archives

WonderChess LLC, Seattle, looks to take some of the intimidation factor out of learning to play chess with its debut game, the self-titled WonderChess.

WonderChess comes with a 52-page illustrated chess instruction book with 10 lessons to help players master this classic game of skill. In addition to the game board and pieces, players also receive three types of stickers featuring motivational words, colored circles and gold stars to be used on the included WonderReward Cards that help track lesson progress.

The game, designed for two players ages 4 and up, is available in a regular edition (SRP \$19.95) and a deluxe edition tin (SRP \$29.95).

For more information on WonderChess, visit [www.wonderchess.com](http://www.wonderchess.com).
